However, in spite of many positive indications, developing countries are still lagging behind in achieving its full objectives. The noble objective of open access will not be realised if scholars in developing countries merely constitute "active consumers" and "passive contributors" under this initiative. These need to be addressed to make knowledge and information readily and widely available to people irrespective of where they live.

**Two-day National Seminar on
“TEERORISM: CHALLENGES AND ISSUES”
December 10-11, 2021**

About the Seminar:

Terrorism is not a new phenomenon. It has now become a global problem. Every nation is facing and trying to curtail its roots but at the same time terrorist organizations are also upgrading their means and object. The issues of terrorism are multifarious and well debated. It is well realized that terrorism is an alternative to fulfil the objectives of the minds of innocent humanities. It has become accepted view that the object of terrorist is to create panic and fear in the minds of the people. It becomes common behaviour of terrorist groups to display their dissatisfaction. The terrorist activities are anti-thesis to the humanism, yet humanists show compassion towards terrorists. Pleading in favour of terrorists and showing sympathy towards them is the striking action for the administration and becomes a major concern for the regional and world leaders to solve the problem. In this regard, Human Rights are considered as those minimal rights, without which one can't subsist as human being. The protection of Human Rights has been treated as most crucial for the common man and the terrorists as well. Human Rights are concerned with life, liberty, dignity and equality. These rights are alive in the international treaties and guaranteed by the signatories to the people living in different regions of the world. India being the signatory of U.D.H.R. and peace loving country has always tried her best to undermine the problem and to curb the menace by passing several legislative Acts in the context of terrorism. Much criticism has been labelled against such uncivilized features of those laws. The Indian judiciary has never remained silent and expressed its firm view to avoid the evil effects of the law. Nevertheless, the govt. has adopted certain policies to achieve welfare measures and tried to provide security and peace. In this context media and other agencies have major role to create confidence and inspire people to make the democracy meaningful. There must be a congenial atmosphere on this globe to live a liveable life. In this view, this Two- day seminar on “Terrorism: Issues and Challenges” shall generate energy for social and humane action through churning of thoughts of various academicians, intellectuals, researchers and persons of media across the country. We hope innovative and thought provoking ideas would be discussed during the seminar to suggest remedies to the policy making agencies again to strengthen their policies for the international peace and humanity.

OBJECTIVES OF THE SEMINAR

This seminar is carried out with the following objectives-

1. To know the reasons of terrorism.
2. To understand the success and failure of government in the eradication of terrorism.
3. To analyze the role of government and media about terrorism.

ABOUT THE SEMINAR

Terrorism is not a new phenomenon. It has now become a global problem. Every nation is facing and trying to curtail its roots but at the same time terrorist organizations are also upgrading their means and object. The issues of terrorism are multifarious and well debated. It is well realized that terrorism is an alternative to fulfil the objectives of the minds of innocent humanites. It has become accepted view that the object of terrorists is to create panic and fear in the minds of the people. It becomes common behaviour of terrorist groups to display their dissatisfaction. The terrorist activities are anti-thesis to the humanism, yet humanists show compassion towards terrorists. Prejudging in favour of terrorists and showing sympathy towards them is the striking action for the administration and becomes a major concern for the regional and world leaders to solve the problem. In this regard, Human Rights are considered as those minimal rights, without which one can't subsist as human being. The protection of Human Rights has been treated as most crucial for the common man and the terrorists as well. Human Rights are concerned with life, liberty, dignity and equality. These rights are alive in the international treaties and guaranteed by the signatories to the people living in different regions of the world. India being the signatory of U.D.H.R. and peace loving country has always tried her best to undermine the problem and to curb the menace by passing several legislative Acts

OBJECTIVES OF THE CONFERENCE

In the context of terrorism, Much criticism has been labelled against such undivulged features of those laws. The Indian judiciary has remained silent and expressed its firm view to avert the evil effects of the law. Nevertheless, the govt. has adopted certain policies to achieve welfare measures and tried to provide security and peace. In this context media and other agencies have major role to create confidence and inspire people to make the democracy meaningful. There must be a congenial atmosphere on this globe to live a livable life. In this view, this Two-day seminar on 'Terrorism: Issues and Challenges' shall generate energy for social and humane action through churning of thoughts of various academicians, intellectuals, researchers and persons of media across the country. We hope innovative and thought provoking ideas would be discussed during the seminar to suggest remedies to the policy making agencies again to strengthen their policies for the international peace and humanity.

OBJECTIVES OF THE SEMINAR

This seminar is carried out with the following objectives-

1. To know the reasons of terrorism.
2. To understand the success and failure of government in the eradication of terrorism.
