#### Measles & Rubella Vaccination Awareness Program

Every year in India nearly 2.7 million children get measles. Those who survive, suffer from serious complications including diarrhea, pneumonia and malnutrition. Rubella transmission is also highly prevalent across India. Rubella infection during pregnancy may lead to spontaneous abortion, stillbirth and irreversible birth defects such as lifelong disabilities affecting multiple organs like deafness, blindness, mental retardation, heart defect etc. Taking this into consideration women study center of Jeevan Vikas Mahavidyalaya organized awareness program about Measles & Rubela Vaccination on Friday, 3<sup>rd</sup> August 2019 on the occasion World Brest Feeding Week. Male and females of the village and nearby villages were present for this awareness programme. Dr. Mahendra Jadhao, Asstt. Medical Doctor, Primary Heath Centre, Mowad was key speaker for this awareness programme. He shared his views about importance of Measles & Rubela Vaccination. Miss Shraddha Kelkar, Principal of AIMS, Chief Guest of the Program throw light on the females important role in making this vaccination programme successful.
